

Outgassing Measurements for Three Materials, Combined with Vacuum Ultraviolet Radiation Illumination of the Volatile Condensable Materials

Filesize: 2.37 MB

Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

OUTGASSING MEASUREMENTS FOR THREE MATERIALS, COMBINED WITH VACUUM ULTRAVIOLET RADIATION ILLUMINATION OF THE VOLATILE CONDENSABLE MATERIALS

To get **Outgassing Measurements for Three Materials, Combined with Vacuum Ultraviolet Radiation Illumination of the Volatile Condensable Materials** PDF, remember to refer to the button below and save the document or get access to other information which might be in conjunction with **OUTGASSING MEASUREMENTS FOR THREE MATERIALS, COMBINED WITH VACUUM ULTRAVIOLET RADIATION ILLUMINATION OF THE VOLATILE CONDENSABLE MATERIALS** book.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The photolysis of three organic materials, by vacuum ultraviolet (VUV) radiation, has been quantified using 15-MHz temperature-controlled quartz microbalances (TQCMs). The rate at which molecular species, released from the individual samples, condensed on two TQCMs was measured for periods of up to 139.9 hours. The individual samples were heated in an effusion cell and the emitted molecular species collected on a pair of TQCMs which were maintained at -40 degrees Celsius. At several points during the deposition measurement, the deposition surface of one TQCM was illuminated by a 30 Watt deuterium lamp, and the loss of material from that surface was observed. VUV illumination of the TQCM, concurrent with condensation, reduced the rate that material was lost from the deposition surface. These measurements present a contrasting picture of molecular deposition, in the presence of VUV, to that presented by other investigators who observed an enhanced rate of molecular deposition, when the deposition surface was illuminated by VUV. This item ships from La Vergne, TN. Paperback.
