

Mathematical Questions and Solutions Volume 19 (Paperback)

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which it basically modified me, altered the way I believe.

(Prof. Loyce Runolfsson Jr.)

MATHEMATICAL QUESTIONS AND SOLUTIONS VOLUME 19 (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1873 Excerpt: .C is $x^2 + mxy + ny^2 - ax - cy = 0$ (1); hence, when this passes through the centroid, we have $aem - 2n = 2o2$ (2). Now the coordinates x, y of the centre of (1) are $= n(cm - 2a) = 2cV b$ (2) (3) $ma - 2cn 2a2. -- --in c(m ---in)$ hence, eliminating m and n from (2), (3), (4), we get $(ac - 2ay - 2cr) - = iacxy$, which is the equation of an ellipse touching the triangle at the point of bisection of each side; it is therefore the maximum inscribed ellipse, and its area is -- of the triangle. 3- 3876. (Proposed by J. J. Sylvester, F.R.S.)--Show that there are 3184 positions in a cubic curve such that at each of them curves of the 50th order may be drawn having 90-point contact with the cubic. Solution by Professor Clifford. The gross number of points where a curve of order n can have $3x$ -point contact with a cubic is $9n^2$. The problem is in fact the same as that of the division of the periods of an elliptic function by 3-, and as there are two periods, there are $9-2$ solutions. (Clebsch, Anwendung der Abelschen Functionen in der Gometrie, Crelle, baii.) But in the case when n is a composite number, all the curves whose order is a divisor of -, and which have complete contact with the cubic, are included in the result. Thus each inflexional tangent, taken n times over, constitutes a curve of order - having 3--point contact with the cubic; and the...
