Struts Continued Allowed stresses per square inch. 14, 000 pounds for lengths less than 30 radii. 16, 000--70--for lengths between 30 radii and 150 radii. Struts Continued Allowed stresses per square inch. 14, 000 pounds for lengths less than 30 radii. 16, 000--70--for lengths between 30 radii and 150 radii. Foundation Grillages As a means of avoiding large masses of masonry and deep excavations, it has become the practice to use in foundation work, grillages composed of beams imbedded in concrete. These grillages are constructed of one, two or three layers of beams, depending on the load to be carried and the capacity of the earth to resist pressure. Such beams should be spaced at least 2yi or 3 apart in the clear between flanges, so as to enable the concrete to be readily placed and tamped. The...
