Suppose now, all the interior bodies to reduce themselves to a single point P, in which a unit of electricity is concentrated, and f to be the distance Pp: the potential function arising from P will be-L, and hence BL. f r being, as before, the distance between p and the centre O of the shell. Let now b represent the distance OP, and e the angle POp, then will fb3--2br. cos or. If the distance of P from the surface, be...
