## THE FABRIC OF SPACE GRAVITY (PAPERBACK)

America Star Books, United States, 2013. Paperback. Book Condition: New. 216 x 140 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.The Fabric of Space Gravity explains the pros and cons about the interstellar space field and possibilities of space travel that includes speculation about time travel and how wormholes and time machines may not at all be a resolution for traveling astronomical distances in space in the future. Rodney Kawecki adventures introducing what he calls Instantaneous Space Travel as the fastest a ship can travel through the cosmos without becoming pressed to traveling backwards or forwards in time. He believes that time travel may not be an adequate explanation to shorten the great distances one faces traveling between galaxy s and star systems. He explains how instantaneous space travel relative to the zero gravity fabric of space may not at all retain the element of gravity that calls to having to travel in the fourth dimension. In the blink of an eye may be the only remedy traveling from point a to point b putting all speculations of space travel in an equation for space travel that allows only the intermediate means for maximum velocity based on the capacity of a ship s engine propulsion value. With a zero point gravity space field bending space or creating wormholes may not at all be the only possible means to travel the distance in space. Space curvature and bending space may not have a place in future technology based on the fact that the space fabric withstands the greatest degree of propulsion and pressure put in its grid in the beginning made in a surviving universe we live in being created from the greatest explosion event of all The Big Bang. Bending and manipulating the space grid made...
