

An Elementary Treatise on the Differential Calculus Founded on the Method of Rates (Paperback)

Filesize: 9.45 MB

Reviews

It is simple in study safer to understand. It can be full of knowledge and wisdom Your way of life span is going to be enhance when you full looking at this book.

(Lavina Torp)

AN ELEMENTARY TREATISE ON THE DIFFERENTIAL CALCULUS FOUNDED ON THE METHOD OF RATES (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 Excerpt: $y = A_0 + A_1 \sin^{-1} x + A_2 (\sin^{-1} x)^2 + A_3 (\sin^{-1} x)^3 + \dots$. After the first, all the equations are of the form $y = A_0 + A_1 \sin^{-1} x + A_2 (\sin^{-1} x)^2 + A_3 (\sin^{-1} x)^3 + \dots$. It is to be noticed that this value of y is not the only solution of the differential equation (4). In the first place, the fact that, had we included A_0 in the assumed series there would have been no way of determining it, shows that $A_0 + (\sin^{-1} x)^2$ is a more general solution. Again, had the odd powers of x been included in the assumed series, there would have been no way of determining A_4 ; but the same relation (5) would have existed between the coefficients of successive odd powers. Thus we should have had the additional terms $A_5 (\sin^{-1} x)^5 + A_7 (\sin^{-1} x)^7 + \dots$. This last series is in fact that for $\sin^{-1} x$, and its occurrence is due to the fact that $y = \sin^{-1} x$ makes the first member of equation (4) vanish. (See Ex. VIII, 17.) Thus the most general solution of the differential equation (4) is $y = A_0 + A_1 \sin^{-1} x + A_2 (\sin^{-1} x)^2 + A_3 (\sin^{-1} x)^3 + \dots$. 133. Differentiation of the result obtained above gives the development $v, 2 J, 2-4.5, 2.4.6 7, \# +x^3 H---: r H--\#7 + vi-2) 3 3-5 3-5-7$ This is equivalent to a development of the arcual measure of an angle in the form of a series involving powers of its sine; for, putting $\sin^{-1} x = \theta$, we have $0 = \cos \theta \sin \theta \text{ Fi} \dots$
